

## Fyne Court Fungi 2016 (Report sent to NT Fyne Court)

The main activity was a joint Foray involving the North Somerset and Bristol Fungus Group (NSBFG) and the Devon Fungus Group on 1 October, supported by a short visit on 3 November. We have picked out a few highlights.

The pasture is the most significant mycological feature, with an excellent range of grassland fungi, including 9 species of Waxcap (many very large) some Clavarioids and species of Entoloma. In October these were dominated by *Hygrocybe intermedia* (the Fibrous Waxcap), to be replaced in November by large numbers of very large *H. punicea* (the Crimson Waxcap). These grassland fungi are very sensitive to disturbance and fertilizers. The present low level of grazing seems to be appropriate. Grassland fungi (CHEGD) are shown in red in the lists below.

During this time there was, perhaps, a surprising lack of mycorrhizal fungi, eg Boletes, species of *Russula*, *Lactarius* and *Amanita*. However, this has been a feature of 2016 throughout the SW and we would expect such species to be present in the woodlands in “normal” years.

Three species are worthy of note in the woodland. *Hydnum ellipsosporum* was found near the Car Park. This is a species rarely reported in the UK. It was first identified Scotland in 2008. Interestingly, we also found this species near Dunster in 2015. Beautiful examples of *Volvariella bombycina* (Silky Rosegill) were seen on an old Chestnut, also above the Car Park, whilst large numbers of Chanterelles (*Cantharellus cibarius*) were fruiting on the banks of the stream where it emerges from the woodland.

A young example of the Crimson Waxcap (*Hygrocybe punicea*) growing in the Pasture (3 November 2016).

## Car Park (ST 2219 3210)

3 Nov 2016

*Aleuria aurantia*  
*Armillaria mellea*  
*Ascocoryne sarcoides*  
*Auricularia mesenterica*  
*Coprinellus micaceus*  
*Neobulgaria pura*  
*Oudemansiella mucida*  
*Peziza micropus*  
*Phlebia radiata*  
*Pholiota squarrosa*  
*Trametes gibbosa*  
*Trametes versicolor*

## Woodland near Car Park (ST 2210 3232)

1 Oct 2016

*Agaricus (section Minores)*  
*Agaricus phaeolepidotus*  
*Aleuria aurantia*  
*Amanita pantherina*  
*Ampulloclitocybe clavipes*  
*Annulohyphoxylon multiforme*  
*Auricularia auricula-judae*  
*Biscogniauxia nummularia*  
*Boletus cisalpinus*  
*Calocera cornea*  
*Cercospora mercurialis*  
*Ceriporiopsis gilvescens*  
*Chaetosphaerella phaeostroma*  
*Cladosporium uredinicola*  
*Clavulina coralloides*  
*Clitocybe costata*  
*Colletotrichum liliacearum*  
*Coprinellus micaceus*  
*Cristulariella depraedans*  
*Daedaleopsis confragosa*  
*Daldinia concentrica*  
*Dendrothele acerina*  
*Diatrypella favacea*  
*Erysiphe circaeae*  
*Exidia glandulosa*  
*Ganoderma australe*  
*Gymnopus confluens*  
*Gymnopus dryophilus*  
*Gymnopus erythropus*  
*Gymnopus fusipes*  
*Gymnopus peronatus*  
*Hebeloma sinapizans*  
*Hemimycena tortuosa*  
*Hydnum ellipsosporum*  
*Hyphodontia sambuci*

*Hypholoma fasciculare*  
*Hypoxylon fragiforme*  
*Hypoxylon fuscum*  
*Inocybe cincinnata var. major*  
*Inocybe cookei*  
*Laccaria amethystina*  
*Laccaria laccata*  
*Lactarius blennius*  
*Lepiota cristata*  
*Lepista nuda*  
*Leucoagaricus badhamii*  
*Leucoagaricus serenus*  
*Leucocoprinus brebissonii*  
*Lycoperdon echinatum*  
*Lycoperdon nigrescens*  
*Lycoperdon perlatum*  
*Lycoperdon pyriforme*  
*Marasmius rotula*  
*Meripilus giganteus*  
*Mycena abramsii*  
*Mycena adscendens*  
*Mycena filipes*  
*Mycena galericulata*  
*Mycena leptcephala*  
*Mycena olida*  
*Mycena polygramma*  
*Mycena speirea*  
*Mycena vitilis*  
*Mycosphaerella confusa*  
*Oudemansiella mucida*  
*Panus conchatus*  
*Parasola leptcephala*  
*Phragmidium violaceum*  
*Pluteus cervinus*  
*Polyporus leptcephalus*  
*Postia subcaesia*  
*Puccinia arenariae*  
*Puccinia behenis*  
*Puccinia glechomatis*  
*Puccinia menthae*  
*Pucciniastrum circaeae*  
*Rhytisma acerinum*  
*Rickenella fibula*  
*Russula atropurpurea*  
*Russula nigricans*  
*Russula ochroleuca*  
*Sawadaea bicornis*  
*Schizopora paradoxa*  
*Scleroderma areolatum*  
*Scleroderma citrinum*  
*Scleroderma verrucosum*  
*Scutellinia pseudotrechispora*  
*Septoria castaneicola*  
*Simocybe sumptuosa*  
*Skeletocutis nivea*  
*Stereum gausapatum*  
*Stereum hirsutum*  
*Stropharia semiglobata*

*Trametes gibbosa*  
*Trametes versicolor*  
*Tricholoma album*  
*Tubifera ferruginosa*  
*Uromyces rumicis*  
*Volvariella bombycina*  
*Xylaria hypoxylon*

**3 Nov 2016**

*Clitocybe nebularis*  
*Crepidotus mollis*  
*Crepidotus variabilis*  
*Gymnopus peronatus*  
*Rhodocollybia butyracea*  
*Tubaria furfuracea*

**Pasture (ST 2212 3249)**

**1 Oct 2016**

*Agaricus depauperatus*  
*Clavaria fragilis*  
*Clavulinopsis laeticolor*  
*Conocybe rickeniana*  
*Cuphophyllus virgineus*  
*Dermoloma cuneifolium*  
*Entoloma porphyrophaeum*  
*Gliophorus psittacinus*  
*Hygrocybe chlorophana*  
*Hygrocybe glutinipes*  
*Hygrocybe insipida*  
*Hygrocybe intermedia*  
*Panaeolina foenisecii*  
*Panaeolus fimicola*  
*Panaeolus papilionaceus*

**3 Nov 2016**

*Armillaria gallica*  
*Cuphophyllus pratensis*  
*Cuphophyllus virgineus*  
*Entoloma porphyrophaeum*  
*Gliophorus psittacinus*  
*Hygrocybe chlorophana*  
*Hygrocybe coccinea*  
*Hygrocybe conica*  
*Hygrocybe punicea*  
*Mycena flavoalba*  
*Panaeolus papilionaceus*  
*Psilocybe semilanceata*

**Woodland beside stream (ST 2248 3244)**

**1 Oct 2016**

*Agaricus moelleri*  
*Cantharellus cibarius*  
*Coprinopsis picacea*  
*Daldinia concentrica*  
*Exidia thuretiana*  
*Hypoxylon petriniae*  
*Lepiota felina*  
*Lepista nuda*  
*Marasmius cohaerens*  
*Mycoacia uda*  
*Panellus conchatus*  
*Peniophora limitata*  
*Psathyrella piluliformis*  
*Ramaria stricta*  
*Russula atropurpurea*  
*Xerocomellus engelii*

**3 Nov 2016**

*Cantharellus cibarius*  
*Hypholoma fasciculare*  
*Mycena galericulata*  
*Mycena inclinata*  
*Xylaria hypoxylon*

**Garden near Reception (ST 2224 3210)**

**1 Oct 2016**

*Melampsora hypericorum*  
*Puccinia caricina* var. *ribesii-pendulae*

**October 1<sup>st</sup> 2016:**

*Cantharellus cibarius* (left), *Hygrocybe intermedia* (right) and *Volvariella bombycina* (lower left)

**November 3<sup>rd</sup> 2016:**

*Oudemansiella mucida* and *Armillaria gallica* (left), *Hygrocybe coccinea* (right), *Hygrocybe chlorophana* (lower left) and *Hygrocybe punicea* (lower right)
