

Public Forays and Audit (29 and 31st October)

As part of the ongoing educational activities of the NSBFG, two Public Forays were held at Tynesfield on 29 October. These involved nearly 40 members of the general public who brought great enthusiasm to the day, which was spent solely in the Plantations. The grassland fungi were very slow to appear this year. A good display of species was found including one new to Tynesfield - *Melastiza cornubiensis*, a small orange disc fungus. It was growing on compressed soil at one of the new children's playgrounds.

During the monthly Audit, held on the following day, a much wider search involved various woodlands, Paradise and many of the Lawns. Species new to Tynesfield are shown in red below: *Lepiota erminea*, *Melastiza cornubiensis*, *Stropharia coronilla* and *Puccinia glechomatis* (rust of Ground Ivy).

The most surprising find was a Bat, probably a Pipistrelle, asleep under the bark of a conifer tree in Warren Plantation.

Among several more interesting finds was *Lactarius semisanguifluus* (lower right) fruiting in large numbers in Paradise. This is readily distinguished from other "green" *Lactarius* by its orange milk turning bright scarlet a few minutes after cutting. Also found were *Geastrum triplex* (top left), and an unidentified species of *Typhula/Macrotyphula* (lower left) in grass on the South Lawn.

Public Forays (29 October)

Agaricus langei
Agaricus moelleri
Antrodia serialis
Armillaria mellea
Ascocoryne sarcoides
Auricularia auricula-judae
Chlorociboria aeruginascens
Chlorophyllum rhacodes
Chondrostereum purpureum
Clitocybe fragrans
Clitocybe nebularis
Clitocybe odora
Clitopilus prunulus
Crepidotus mollis
Cystolepiota seminuda
Exidia glandulosa
Flammulina velutipes
Galerina marginata
Geastrum triplex
Gymnopilus penetrans
Hydropus floccipes
Hypholoma fasciculare
Laccaria amethystina
Lactarius vellereus
Lepiota castanea
Lepista flaccida
Lepista sordida
Marasmius wynneae
Melanoleuca polioleuca
Melanotus horizontalis
Melastiza cornubiensis
Mucilago crustacea
Mycena arcangeliana
Mycena haematopus
Mycena rosea
Oudemansiella mucida
Oudemansiella mucida
Peziza micropus
Pleurotus dryinus
Pleurotus ostreatus
Pluteus cervinus
Pluteus salicinus
Pluteus umbrosus
Psathyrella spadiceogrisea
Russula ochroleuca
Schizophyllum commune
Stereum hirsutum
Trametes versicolor
Tremella foliacea
Tubifera ferruginosa
Xerula radicata

October Audit (31 October)

Agaricus campestris
Agaricus porphyrizon?
Agaricus (section Minores)
Agaricus silvaticus
Armillaria gallica
Armillaria mellea
Armillaria ostoyae
Auricularia auricula-judae
Bjerkandera adusta
Claviceps purpurea
Clavulina cinerea
Clavulina rugosa
Clavulinopsis laeticolor
Clitocybe fragrans
Clitocybe metachroa
Ampulloclitocybe clavipes
Clitocybe phaeophthalma
Clitocybe rivulosa
Clitopilus prunulus
Clitopilus prunulus
Conocybe arrhenii
Conocybe juniana
Conocybe nemoralis
Conocybe pulchella
Conocybe siennophylla
Conocybe subpallida
Coprinellus lagopus
Coprinus comatus
Crepidotus mollis
Cuphophyllum virgineus
Cuphophyllum virgineus
Cystolepiota seminuda
Daldinia concentrica
Dermoloma cuneifolium
Entoloma hebes
Entoloma pleopodium
Galerina clavata
Galerina graminea
Galerina sideroides
Gliophorus irrigatus
Gliophorus psittacinus
Gliophorus psittacinus
Gymnopilus penetrans
Gymnopus dryophilus
Hygrocybe ceracea
Hygrocybe chlorophana
Hygrocybe coccinea
Hygrocybe insipida
Hygrocybe insipida
Hygrocybe pratensis
Hygrocybe punicea
Hygrocybe quieta
Hygrophoropsis aurantiaca

Hypholoma fasciculare
Hypholoma fasciculare
Hypholoma fasciculare
Inocybe cincinnata var. cincinnata
Inocybe fuscidula
Inocybe geophylla
Laccaria amethystina
Laccaria laccata
Laccaria laccata
Laccaria laccata
Lactarius fulvissimus
Lactarius fulvissimus
Lactarius semisanguifluus
Lepiota castanea
Lepiota castanea
Lepiota cristata
Lepiota erminea
Lepiota pseudolilacea
Lepista flaccida
Lepista flaccida
Lepista nuda
Lycoperdon excipuliforme
Lycoperdon excipuliforme
Lycoperdon perlatum
Lycoperdon perlatum
Lycoperdon pratense
Lycoperdon pyriforme
Macrocystidia cucumis
Macrocystidia cucumis
Marasmius oreades
Marasmius wynneae
Melanoleuca polioleuca
Melanoleuca polioleuca
Melanotus horizontalis
Melanotus horizontalis
Mycena aetites
Mycena arcangeliana
Mycena capillaris
Mycena capillaris
Mycena filopes
Mycena filopes
Mycena flavoalba
Mycena galericulata
Mycena inclinata
Mycena leptocephala
Mycena olivaceomarginata
Mycena pelianthina
Mycena pura
Mycena rosea
Mycena rosea
Mycena speirea
Mycena vitilis
Nectria cinnabarina
Oudemansiella mucida
Parasola conopilus

Parasola leiocephala
Phallus impudicus
Pholiota gummosa
Pluteus cervinus
Pluteus salicinus
Psathyrella candolleana
Psathyrella microrhiza
Psathyrella prona

Puccinia glechomatis
Rhodocollybia butyracea
Rugosomyces carneus
Russula caerulea
Russula chloroides
Russula sanguinaria
Stropharia coronilla
Thelephora caryophyllea

Trametes gibbosa
Trametes versicolor
Trichaptum abietinum
Tricholoma sculpturatum
Tubaria furfuracea
Xerula radicata
Xerula radicata
Xylaria hypoxylon
