

## Tyntesfield Audit July 242017

An Audit was squeezed in just before the school holidays, so the weather was still generally very warm and dry! This was soon to change – see our August Report. Despite the lack of rain, we found more than 40 species, including two species of *Hohenbuehelia* which are now regularly fruiting on a log pile in Plantation.

Several interesting fungi are illustrated below.

### List of Fungi

*Agaricus campestris*  
*Auricularia auricula-judae*  
*Boletus ferrugineus*  
*Coprinopsis lagopus*  
*Crepidotus mollis*  
*Cristulariella depraedans*  
*Erysiphe circaeae*  
*Exidia nucleata*  
*Fistulina hepatica*  
*Flammulaster muricatus*  
*Fuligo septica*  
*Gymnopus confluens*  
*Gymnopus dryophilus*  
*Gymnopus fusipes*  
*Gymnopus peronatus*  
*Heterobasidion annosum*  
*Hohenbuehelia atrocaerulea*  
*Hohenbuehelia petaloides*  
*Hymenochaete rubiginosa*  
*Lycogala epidendrum*  
*Lycoperdon perlatum*  
*Marasmius oreades*  
*Marasmius rotula*

*Megacollybia platyphylla*  
*Mycena tenerrima*  
*Mycena corynephora*  
*Nectria coccinea*  
*Panaeolina foenisecii*  
*Parasola conopilus*  
*Parasola leiocephala*  
*Parasola plicatilis*  
*Pluteus cervinus*  
*Pluteus ephebeus*  
*Postia fragilis*  
*Psathyrella candolleana*  
*Psathyrella leucotephra*  
*Psathyrella microrhiza*  
*Reticularia lycoperdon*  
*Russula decipiens*  
*Sawadaea bicornis*  
*Stereum hirsutum*  
*Suillus granulatus*  
*Trametes gibbosa*  
*Tubifera ferruginosa*

### ***Boletus ferrugineus***

*Exidia nucleata* and *Collybia fusipes*

*Hohenbuehelia atropurpurea* and *H. petalodes*
