

## Foray near Wickwar – late August 2020

Photographs supplied by Ross.

***Amanita ceciliae*** (left), a non ringed species with grey flakes on a pale olive striate cap.

***Boletus aereus*** (right), although similar to *B. reticulatus*, the flesh of *B. aereus* should stain rust red when treated with ammonia or NaOH.

***Leccinum scabrum*** (left), lacking any signs of blueing on the stem

***Leccinum albostipitatum*** (right), typically showing orange brown cap and whitish scales along the stipe, with slight blueing at the base.
