

## Burrington Combe, ST476588: 26 September 2021

After too long an absence, the Group were excited to meet for the first Foray since 2019. The Foray, led by Phil, involved a good walk over Mendip Grasslands and through adjacent mixed woodlands. Over 40 species were encountered. Very few fungi were seen in the grasslands, but one, *Mitrlula paludosa* (Bog Beacon) was a notable species new to North Somerset. Only one Waxcap was found, *Hygrocybe quieta*. In the woodlands, there was a good display of *Leccinum* species, along with one other new species, *Peziza lobulata*.

Thank you to Olivia for the excellent photos shown below.

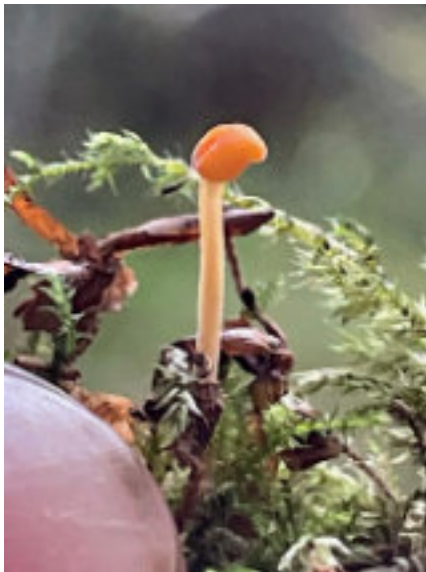

### List of Fungi

*Agaricus litoralis*  
*Boletus edulis*  
*Boletus luridus*  
*Bulgaria inquinans*  
*Calocera viscosa*  
*Chalciporus piperatus*  
*Clitocybe rivulosa*  
*Clitopilus prunulus*  
*Cystolepiota seminuda*  
*Daedaleopsis confragosa*  
*Daldinia concentrica*  
*Fuligo septica*  
*Hygrocybe quieta*  
*Hypoxylon fuscum*

*Imleria badia*  
*Kretzschmaria deusta*  
*Laccaria amethystina*  
*Laccaria laccata*  
*Leccinum cyaneobasileucum*  
*Leccinum scabrum*  
*Leccinum versipelle*  
*Lycoperdon echinatum*  
*Lycoperdon perlatum*  
*Marasmiellus ramealis*  
*Melanoleuca polioleuca*  
*Mitrlula paludosa*  
*Mycena epipterygia*  
*Mycena haematopus*  
*Mycena filopes*  
*Mycena galericulata*

*Mycena polygramma*  
*Panaeolus papilionaceus*  
*Paxillus involutus*  
*Peziza lobulata*  
*Piptoporus betulinus*  
*Pluteus cervinus*  
*Psilocybe semilanceata*  
*Rickenella fibula*  
*Russula nigricans*  
*Russula ochroleuca*  
*Stereum rugosum*  
*Stropharia semiglobata*  
*Trametes versicolor*  
*Xylaria polymorpha*

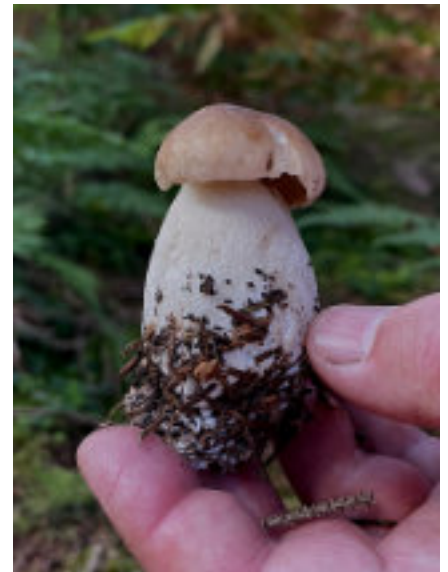

*Mitrlula paludosa*

*Leccinum scabrum*

*Boletus edulis*

*Chalciporus piperatus*

*Imleria badia*

*Mycena epipterygia*

*Melanoleuca polioleuca* (below)

*Cystolepiota seminuda* (right)

*Mycena haematopus* (lower right)
