

## Tyntesfield Audit Monday 21 November 2016

Many thanks to Judith, Roy and John who turned out on what proved to be one of the wettest days of the year! As a result we concentrated on the grassland fungi, especially the Waxcaps (W) on the various lawns. Despite the weather, we saw a good display on both the South Lawns and in Paradise. *Hygrocybe coccinea* was well represented, as were two unusual species of *Clavulinopsis* (*C. laeticolor* and *C. luteoalba*). As in all the Audits, a full list of the distribution of the species found has been recorded.

Tyntesfield has two BAP species: *Microglossum olivaceum* (the Olive Earth Tongue) and *Entoloma madidum*. No fruitbodies of *Entoloma madidum* were found (it has not been seen since 2014), but there was a magnificent display of Earth Tongues, with many hundreds present in a very small area.

Unfortunately, the heavy rain prevented any photography

*Agaricus campestris*  
*Agaricus macrocarpus*  
*Auricularia auricula-judae*  
*Baeospora myosura*  
*Clavulina rugosa*  
*Clavulinopsis laeticolor*  
*Clavulinopsis luteoalba*  
*Clitopilus prunulus*  
*Cuphophyllus pratensis* (W)  
*Cuphophyllus virgineus* (W)  
*Entoloma conferendum*  
*Gliophorus psittacinus* (W)  
*Hygrocybe ceracea* (W)  
*Hygrocybe chlorophana* (W)

*Hygrocybe coccinea* (W)  
*Hygrocybe insipida* (W)  
*Hygrocybe punicea* (W)  
*Hygrocybe quieta* (W)  
*Hygrocybe russocoriacea* (W)  
*Inocybe geophylla*  
*Laccaria laccata*  
*Lactarius fulvissimus*  
*Melanoleuca polioleuca*  
*Microglossum olivaceum*  
*Mycena olivaceomarginata*  
*Russula parazurea*  
*Tubaria dispersa*

***Microglossum olivaceum*, photographed at the same site in 2011**
