

## Tyntesfield Audit Wednesday 14 December 2016

A beautiful morning for Roy, John, Doreen, Nicola, Jean and Judy to explore the woodlands. One highlight was to see how extensively the fungi had developed on a new log pile, with many good examples of *Bulgaria inquinans* and *Flammulina velutipes* (see photographs). Amongst the surprises were a large group of Parrot Waxcaps in the woodland litter.

The grassland fungi continued to fruit on some of the lawns with several waxcaps (W). and the colony of *Microglossum olivaceum* remained fruiting in considerable numbers.

*Bulgaria inquinans*

*Flammulina velutipes*

A recently constructed log pile showing extensive coverage of a range of different fungi, but dominated by *Stereum hirsutum*

## Parrot Waxcaps (*Gliophorus psittacinus*), growing in Plantation Woodland

### List of Species

- |                                   |                                    |                                  |
|-----------------------------------|------------------------------------|----------------------------------|
| <i>Armillaria mellea</i>          | <i>Geastrum triplex</i>            | <i>Mycena leptcephala</i>        |
| <i>Armillaria ostoyae</i>         | <i>Gliophorus irrigatus</i> (W)    | <i>Mycena metata</i>             |
| <i>Ascocoryne cylichnium</i>      | <i>Gliophorus psittacinus</i> (W)  | <i>Mycena polygramma</i>         |
| <i>Auricularia auricula-judae</i> | <i>Gymnopilus bellulus</i>         | <i>Mycena rosea</i>              |
| <i>Baeospora myosura</i>          | <i>Gymnopilus fulgens</i>          | <i>Mycena tenerrima</i>          |
| <i>Bjerkandera adusta</i>         | <i>Gymnopilus penetrans</i>        | <i>Mycena vitilis</i>            |
| <i>Bulgaria inquinans</i>         | <i>Gymnopilus confluens</i>        | <i>Nectria cinnabarina</i>       |
| <i>Cerrena unicolor</i>           | <i>Gymnopilus dryophilus</i>       | <i>Nectria coccinea</i>          |
| <i>Chondrostereum purpureum</i>   | <i>Heterobasidion annosum</i>      | <i>Nectria ralfsii</i>           |
| <i>Clavaria fumosa</i>            | <i>Hygrocybe aurantiosplendens</i> | <i>Panaeolus acuminatus</i>      |
| <i>Clavulina rugosa</i>           | (W)                                | <i>Parasola plicatilis</i>       |
| <i>Clavulinopsis corniculata</i>  | <i>Hygrocybe chlorophana</i> (W)   | <i>Peniophora pini</i>           |
| <i>Clitocybe fragrans</i>         | <i>Hygrocybe insipida</i> (W)      | <i>Phloeomana speirea</i>        |
| <i>Clitocybe geotropa</i>         | <i>Hygrocybe russocoriacea</i> (W) | <i>Pholiota gummosa</i>          |
| <i>Clitocybe metachroa</i>        | <i>Hygrophoropsis aurantiacus</i>  | <i>Pleurotus ostreatus</i>       |
| <i>Clitocybe nebularis</i>        | <i>Hygrophorus unicolor</i>        | <i>Pluteus cervinus</i>          |
| <i>Clitocybe vibecina</i>         | <i>Hyphodontia sambuci</i>         | <i>Psathyrella microrhiza</i>    |
| <i>Conocybe arrhenii</i>          | <i>Hypholoma fasciculare</i>       | <i>Resinicium bicolor</i>        |
| <i>Conocybe teneroides</i>        | <i>Hypoxylon fragiforme</i>        | <i>Rhodocollybia butyracea</i>   |
| <i>Coprinellus micaceus</i>       | <i>Inocybe geophylla</i>           | <i>Rickenella swartzii</i>       |
| <i>Cortinarius biformis?</i>      | <i>Laccaria laccata</i>            | <i>Russula ochroleuca</i>        |
| <i>Crepidotus cesatii</i>         | <i>Lactarius subdulcis</i>         | <i>Russula parazurea</i>         |
| <i>Crepidotus mollis</i>          | <i>Lepiota cristata</i>            | <i>Schizophyllum commune</i>     |
| <i>Cuphophyllus pratensis</i> (W) | <i>Lepista flaccida</i>            | <i>Scutellinia scutellata</i>    |
| <i>Cuphophyllus virgineus</i> (W) | <i>Lepista nuda</i>                | <i>Sparassis crispa</i>          |
| <i>Dacrymyces stillatus</i>       | <i>Lycoperdon perlatum</i>         | <i>Stereum hirsutum</i>          |
| <i>Daldinia concentrica</i>       | <i>Lycoperdon pyriforme</i>        | <i>Stereum subtomentosum</i>     |
| <i>Datronia mollis</i>            | <i>Melanotus horizontalis</i>      | <i>Tephroclybe anthracophila</i> |
| <i>Echinoderma asperum</i>        | <i>Microglossum olivaceum</i>      | <i>Tephroclybe atrata</i>        |
| <i>Entoloma hebes</i>             | <i>Mycena aetites</i>              | <i>Trametes gibbosa</i>          |
| <i>Exidia nucleata</i>            | <i>Mycena filopes</i>              | <i>Trametes versicolor</i>       |
| <i>Exidia thuretiana</i>          | <i>Mycena flavoalba</i>            | <i>Tremella mesenterica</i>      |
| <i>Flammulina velutipes</i>       | <i>Mycena galericulata</i>         | <i>Tubaria furfuracea</i>        |
| <i>Galerina atkinsoniana</i>      | <i>Mycena galopus</i>              | <i>Xylaria hypoxylon</i>         |
| <i>Ganoderma australe</i>         | <i>Mycena inclinata</i>            |                                  |
